

SUPPLIED TO BUSCH GROUP

Vacuum Pump Castings

For Busch Group's rotary vane and screw vacuum pumps, DK Industries casts housings and manifolds that hold a vacuum-tight seal under sustained operation. Surface finish and dimensional accuracy are held tightly so mating faces seat correctly without additional machining allowance, supporting both the German production line and Busch's Indian manufacturing unit.

Technical Specification

Casting grade	Fine-grain casting
Sealing requirement	Vacuum-tight sealing faces
Components	Housing & manifold castings
Tolerance class	Tight dimensional accuracy, no extra machining allowance
Customers	Busch Produktion GmbH (Germany) & Busch Manufacturing India
Facility	10,000 sq ft owned facility, Shirol MIDC, Kolhapur

Key Features

- Fine-grain casting for a consistent, vacuum-tight sealing surface
- Mating faces held to tight dimensional accuracy
- Same specification supplied to Busch's German and Indian manufacturing units
- Dimensional and visual inspection precedes every dispatch
